**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 27-29 and 31-33 to a hair clipping device with moving blades oriented so that the wide and narrow edges are back to back, cam follower and eccentric drive, classified in class 30, subclass 216.
  - II. Claim 34-36, drawn to a hair clipping device with a locking mechanism, classified in class 30, subclass 337.
  - III. Claims 30 and 37-42, drawn to a hair clipping device with blade edges isolated from the cutting location to prevent unwanted cutting by the non-selected blades and vacuum intake, classified in class 30, subclass 124.

The inventions are distinct, each from the other because of the following reasons:

2. Claim 25 links the inventions of groups I-III. The restriction requirement of the linked inventions is subject to the nonallowance of the linking claim 25. Upon the allowance of the linking claims, the restriction requirement as to the linked inventions shall be withdrawn and any claims depending from or otherwise including all the limitations of the allowable linking claims will be entitled to examination in the instant application. Applicants are advised that if any such claims depending from or including all the limitations of the allowance linking claims is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejection over the claims of the instant application. Where a restriction requirement is withdrawn, the

Art Unit: 3724

provisions of 35 U.S.C. 121 are no longer applicable. In re Ziegler, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP 804.01

3. It should be noted that claim 26 is not in any group and will be examined with any elected group.

4. Inventions of Groups I-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, the invention of Group I has separate utility such as it could be used without the vacuum intake of Group III; conversely, the invention of Group III has separate utility such as it could be used without the cam follower and eccentric drive. See MPEP § 806.05(d).

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
